DETAILED ACTION

Information Disclosure Statement

1. The Information Disclosure Statements (IDSs) received on September 16, 2002 and March 1, 2004 have been considered by the Examiner, and the initialed copies (four copies) of the IDSs are attached with this correspondence.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the claimed "plurality of receivers receiving timing reference signals" in claims 1-3 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New

Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claimed "receiver for receiving timing reference" in claim 1 and 2 is not disclosed in the specifications.

5. Claim 3 is rejected as being dependent on the rejected base claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 2631

7. Claims 7 and 8 rejected under 35 U.S.C. 102(a) as being anticipated by **Haq et al.**, **Haq** thereafter (IEEE Publication "JAZIO SIGNAL-SWITCHING TECHNOLOGY A low-Cost Digital I/O for High-Speed Applications").

Haq discloses a differential receiver comprising (fig.8a) having a plurality of receivers, each of the receiver comprising: receiving a corresponding data signals (data_In 0-data_In 3); a common voltage and complimentary voltage (VTR and VTRB); and outputting a corresponding data output having inherent ZEROs or ONEs as in claim 7. Further to claim 8, **Haq** also shows there each of the receiver having a corresponding programmable delay (see inverters in fig. 8a).

Allowable Subject Matter

8. Claims 4-6 and 9-13 are allowed.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent publication numbers US 2002/0152340 A1 and US 2005/0212564 to Dreps et al and Gabillard et al. respectively and US patent number 6,327,205 issued to Haq disclose a differential receiver having means for deskewing the received signal.
